

BizBuilder Business Plan

Use these worksheets and questions to create a complete business plan. Follow the guidelines in Chapter 4 to ensure the quality of the business plan. The tables and questions are designed to help you organize your plan and are not necessary to include as tables in the final plan. By using the worksheets and questions your plan will be a better roadmap for running your organization and will make it more attractive to investors.

1.0 Executive Summary

The Executive Summary is your primary selling section of the business plan. It should be clear, concise and compelling. Within 1 to 2 pages, the reader should be interested, engaged and well-informed about your business model, your requirements, and expectations.

- A. What is the **full legal name** of your organization?
- B. Describe your **business idea** using Table 1.1 to guide the coverage of pertinent topics. Select them according to whether you are planning a start-up, purchasing an existing business, securing a franchise, or licensing technology. If you are expanding a firm, you can follow the guidelines which fit best.

Table 1.1 Executive Summary Description Guide				
Components of the Business	Start-Up	Buy Existing	Secure a Franchise	License Technology
Customers	None	Established	None - but may have name recognition	None
Products or Services	None	Established	Developed	In process
Location	Needed	In place	Assistance possible	Needed
Management Control	Owner	Owner	Owner within terms of license	Owner within terms of license
Operational Control	Owner	Owner	Owner within terms of license	Owner
Marketing	Needed	In place (+/-)	Assistance possible. Rules absolutely.	Needed
Reputation	None	In place (+/-)	Should be. If not, why license?	Possible
Royalties/Fees	Not usual	Maybe	Ongoing	Likely
Financing	Needed	Prior owner may provide	Assistance possible	Needed
Disclosures	None	Buyer beware	UFOC & contracts	Agreement

My business best fits the category and means that we will

Business Idea:

C. Target Market (Answer who, what, when, where, and why.)

Table 1.2 Target Market Description	
Factor of Target Market	Description
(who)	
(what)	
(when)	
(where)	
(why)	

D. What type of organization are you starting? (*Manufacturing, Wholesale, Retail?*
For-profit or not-for-profit?)

E. What products and/or services will you offer?

Table 1.3 Product/Service Offerings	
	Description
Product/Service 1	
Product/Service 2	
Product/Service 3	
Product/Service 4	

F. What is your marketing and sales strategy? Explain how your business idea will satisfy a customer need.

Table 1.4 Marketing & Sales Strategy	
Customer Need	How Your Business Will Satisfy It

G. Describe the key success factors for the organization.

Table 1.5 Key Success Factors	
Success Factor	How It Works within Your Organization

H. Calculate the “economics of one unit” for your organization.

Table 1.6 Economics of One Unit	
One Unit =	
Selling Price per Unit	\$
– COGS per Unit	
– Other Variable Costs	
TOTAL Variable Costs per Unit	\$
Contribution Margin per Unit	\$

I. What are your short-term business goals? (less than one year) Long-term business goals? (from one to five years)

Table 1.7 Business Goals	
Short-Term Goal	Measure of Success
Long-Term Goal	Measure of Success

- J. What resources and skills do you (and the other owners and managers) have that will help make your organization successful? What other skills are needed and how will they be obtained? These would include operations, finance, accounting, sales, management, and the like.

Table 1.8 Skill and Resource Inventory		
Resource or Skill	Who Has the Skill/Resource?	If Needed, How Will It Be Obtained?

- K. If there is more than one owner, describe how the ownership will be shared.

Table 1.9 Ownership	
Owner	Percent of Ownership
	%
	%
	%
	%

- L. What are the sources and uses of funds?

Table 1.10 Sources and Uses of Funds			
Sources of Funds	Amount	Uses of Funds	Amount Spent

	Received		
	\$		\$
	\$		\$
	\$		\$
	\$		\$
	\$		\$
	\$		\$
	\$		\$

M. Include a summary of the financial projections.

Table 1.11 Summary Financial Projections			
Topic	Key Measure	Growth or Growth Rate	Time Frame
Revenue	Sales Growth		
Profitability	Return on Investment or Return on Sales		
Industry Position	Market Share		
Value	Net Worth		

N. What is the growth and exit strategy? (For example, self-generated growth, growth through merger or acquisition, franchising, sale of the company, IPO)

2.0 Mission, Vision, & Culture

- A. Write a mission statement for your organization in 21 words or fewer that clearly states your competitive advantage, strategy, and tactics. UniStay connects students to verified, affordable co living spaces through smart matching, secure payments, and trusted community support.

- B. Create a vision statement for your organization.

To become Southeast Asia's most trusted student housing ecosystem where every student, regardless of background or nationality, can find a safe, compatible, and affordable home away from home with confidence and ease.

- C. Describe the core beliefs you will use to run your organization and how they will be reflected in its culture.

Table 2.1 Core Beliefs and Culture	
Core Belief	How It Is Reflected in the Culture
Safety First	All listings and accounts are thoroughly verified before proceeding. The company values student safety over fast scaling, declining to partner with unverified landlords regardless of business pressures.
Transparency	All fees, contracts, and payment breakdowns are clearly displayed with no hidden costs. Staff are encouraged to communicate openly with users and within teams.
Inclusivity	Our service caters to international students, providing translation and easy registration processes to ensure that no student feels marginalized because of the language gap.
Student Centricity	The development of every feature takes into account the problems faced by our students. It's important for team members to collect student feedback regularly.
Accountability	Both landlords and students are held to clear digital agreements and community standards. Internal teams are equally expected to own their decisions and outcomes.

- D. Identify the ways you plan to run a socially responsible organization.

1. Combating Housing Scams - UniStay conducts strict verifications of both landlords and their properties to safeguard vulnerable students against scamming housing ads and unethical rent agencies.

2. Supporting Affordable Housing Access - This app focuses on affordable rentals in close proximity to universities and even provides a plan to pay off the initial deposit, making sure that monetary issues will not hinder the ability of students to find suitable housing.

3. Promoting Inclusive Housing for International Students- With multilingual services, simplified registration process and roommate-matching on the basis of compatible preferences, international students can overcome feelings of isolation when moving to a new place.

4. Advancing SDG 11 - Sustainable Cities and Communities- By connecting students to verified housing near public transportation and essential facilities, UniStay actively contributes to reducing urban housing insecurity and encouraging more efficient use of residential spaces within student communities.

3.0 Company Description

- A. What industry (or industries) are you in? (Identify each industry, find its NAICS Code and list the products/services that you will offer which fit the category.) Remember you can go to the U.S. Census Web site to identify your industry code and obtain some data (<http://www.census.gov>).

Table 3.1 Industry		
Industry	NAICS Code	Products/Services
Other activities related to real estate	531390	Property listing platform, roommate matching service
Offices of real estate agents and brokers	531210	Connect students with property owners, facilitate rentals

- B. What type of organization is it (*manufacturing, wholesale, service*)?
Service

- C. What needs will this business satisfy? (Same as Table 1.4)

Table 3.2 Marketing & Sales Strategy	
Customer Need	How Your Business Will Satisfy It
Safe and trustworthy accommodation	All property undergo landlord verification to reduce scams
Affordable student housing	Student can search accommodation based on budget
Finding compatible roommates	Uses a questionnaire covering students' habits and preferences to recommend suitable roommates
Support for maintenance and repairs	Helps student contact the service they need

- D. What is your strategic advantage?

We have a roommate matching system while other similar platforms focus only on finding housing. We also designed UniStay specifically around student needs, while others tend to be general rental platforms.

- E. What is your organization's legal structure (*sole proprietorship, partnership, LLC, C Corp, etc.*)?

Limited liability company (LLC)

- F. Why did you choose this legal structure? The LLC structure allows its owners limited liability while offering them the advantage of management and business growth.

- G. In what state are you registered or do you intend to register? **Selangor, Malaysia.**
- H. Where will you physically operate the organization? (office address) **Bandar Sunway, 47500 Subang Jaya, Selangor, Malaysia.**
- I. What is the geographic reach of the organization? **Initially throughout Malaysia, focusing on major university cities. Future expansion may include other Southeast Asian countries.**
- J. Who will be the owner(s), partners, or stockholders for your company? If your business is incorporated, describe what percentage of the company is owned by each shareholder. (same as Table 1.9)

Table 3.3 Ownership	
Owner	Percent of Ownership
	%
	%
	%
	%

4.0 Opportunity Analysis & Research

A. Describe your research methods (*surveys, focus groups, general research, and statistical research*). Select **only** those that apply. Be specific about how you will select your respondents and sources. Remember to ensure the integrity of your data.

Research Method	When	Respondents/Description
Written survey (online)	Before launching	An online questionnaire using Google Forms was distributed to university students. The survey collected data on accommodation challenges, rental scams, roommate preferences, budgeting concerns, and interest in features.
Focus Groups	After survey analysis	Conduct discussion to gain deeper insights into housing experiences, roommate compatibility concerns, and desired platform features
Document Research	During market research stage	Review academic articles, housing reports, university accommodation statistics, and government publications related to student housing, rental scams
Personal Interviews	During Validation Stage	Interview students to understand industry challenges and verify survey findings
Benchmarking	During Competitor analysis	Compare UniStay's features, pricing model, and user experience with existing accommodation platforms
Online Searches	Throughout the research process	Collect market trends, student housing demand data, competitor information, and emerging co-living trends from reliable online sources
Article and Book searches	Throughout the research process	Use academic journals, business articles, and industry publications to support market analysis and identify practices
Competitor Websites	During Competitor analysis	Analyze competitor platform's services, pricing, verification systems, payment methods, and custom reviews to identify market gaps and opportunities

Data Integrity:

- Collect responses from a diverse group of local and international students
- Use anonymous surveys to encourage honest feedback
- Verify information using multiple sources
- Use reputable academic, industry, and government sources for secondary research

B. Describe your target customer along **as many** dimensions as you have defined (i.e., *demographic, geographic, needs, trends, decision-making process*).

Dimension	Target
Demographic	University students aged 18-30 including local and international students seeking accommodation near their campus
Geographic	Students living in major university cities and education hubs, focusing on Malaysia before expanding
Needs	Safe and verified accommodation, compatible roommates, transparent rental agreements, affordable housing options, and convenient rent payment management
Trends	Growing demand for digital housing platforms, co-living arrangements, roommate matching services, and secure online transactions
Lifestyles	Students who value convenience, affordability, flexibility, and community living while balancing academic personal commitments
Psychographics	Safety conscious, budget conscious, technology savvy individuals who prefer reliable, trusted, and hassle-free housing solutions
Primary target	Undergraduate and postgraduate students who are moving away from home for study purposes

4.1 Industry Analysis

A. What is the industry or set of industries in which your organization operates (include the NAICS codes)? Remember you can go to the U.S. Census Web site to identify your industry code and obtain some data (<http://www.census.gov>). Same as Table 3.1.

Table 4.3 Industry		
Industry	NAICS Code	Products/Services
Residential Property Managers	531110	Verified student housing listings, co-living coordination, rental agreements
Real Estate Agents & Brokers	531210	Verified student housing listings, co-living coordination, rental agreements
Software-as-a-Service (SaaS)/Platforms	511210	Roommate matching algorithm, automated split payment system, in-app communication
Online Marketplaces for Housing	531120	Platform connecting students with property owners/agents

B. What factors influence the demand for your product or service?

Table 4.4 Demand Influences	
Demand Factor	How Does it Influence Demand?
Rising student enrollment (local & international)	More students seeking off-campus housing increases need for verified, safe accommodation
Increase in rental scams and fake listings	Heightens student demand for a trusted, verified platform over unregulated marketplaces like Facebook or Craigslist.
Growth of co-living trends	Younger generations prioritize community, flexibility, and shared costs, increasing appeal of roommate matching.
International student mobility	International students face unique challenges (language, unfamiliarity) driving demand for multilingual, all-in-one housing solutions.
Affordability concerns	Rising rent costs push students toward shared housing and transparent split-payment systems.

C. What factors influence the supply for your product or service?

Table 4.5 Supply Influences	
Supply Factor	What Is the Influence?
Number of property owners/agents willing to verify listings	Low participation reduces platform inventory; high participation increases trust and user acquisition.
Regulatory environment (e.g., short-term rental laws)	Strict housing regulations may limit available properties; favorable policies encourage more listings.
University partnerships	Partnerships provide access to verified student demand and potentially preferred housing inventory.
Technology infrastructure	Availability of cloud computing, payment gateways, and mapping APIs enables scalable platform operations.
Investor interest in proptech/edtech	Influences UniStay's ability to secure funding for development, marketing, and expansion.

D. How large is your industry (*historic, current, projected size*)?

Table 4. 6 Industry Size			
Time Frame	Dates Included	Size (\$ or units)	Data Source
Historic size	2019-2021	Estimated 1.2M students seeking housing	Ministry of Higher Education Malaysia reports
Current size	2024	Estimated \$450 million in student housing transactions	Industry analysis / PropertyGuru reports
Projected size	2028	\$750 million; 15% CAGR	Market research reports (e.g., Statista, JLL Student Housing)

E. What are the current and anticipated characteristics and trends in the industry?

- Digitalization: Shift from offline agents and paper agreements to online verification, digital contracts, and automated payments.
- Safety & Trust focus: Increasing demand for scam detection, safety ratings, and verified listings due to rising fraud cases.
- Flexible leases: Students prefer 6-month co-living contracts over traditional 12-month leases.
- Sustainability & SDG alignment: Growing alignment with UN SDG 11 (Sustainable Cities and Communities), appealing to impact investors and universities.
- Competitor landscape: Dominated by generalist platforms (iProperty, Mudah.my, Facebook Marketplace) with low verification; niche student platforms (e.g., AmberStudent, Casita) but few with roommate matching and split payments combined.

F. What are the major customer groups for the industry (*consumers, governments, businesses*)?

Major customer groups for the industry:

- Students (local and international)
- Parents/families paying for student housing
- Universities (as referral partners)
- Property owners and real estate agents

G. How large is your target market (*number of customers, size of purchases, frequency of purchases, trends*)?

Table 4.7 Target Market Size		
Measures of Market Size	Size	Source of Data
Number of customers	1.5 million university students in Malaysia;	Ministry of Higher Education Malaysia

	200,000 actively seeking off-campus housing annually	
Size of purchases	Average monthly rent per student: RM 450 – RM 1,500	PropertyGuru / iProperty student reports
Frequency of purchases	Once per academic year (or twice for 6-month flexible contracts)	UniStay co-living contract model
Trends	68% increase in online housing searches by students post-COVID; 40% of students prefer verified platforms with roommate matching	Industry surveys / UniStay internal research

4.2 Environmental Analysis

- A. Perform a SWOT analysis of your organization. Remember that strengths and weaknesses are internal for an organization and that opportunities and threats arise from the external environment.

Strengths - Unique roommate compatibility matching systems - Verified property listings - Automated split payment system - All in one ecosystem (housing search, payments, communication, and safety information) - Focus on student safety	Weakness - High operational cost - Require significant development and maintenance costs
Opportunities - Growing number of local and international student looking for accommodation - Partnerships with universities, student agent - Expansion into additional services (renter protection and premium subscriptions) - Increasing demand for digital solutions - - expansions to other cities and countries	Threats - Competition from existing property rental platforms and marketplaces - Rental scams and fraudulent users - Changes in housing regulations or rental policies - Economic downturns - Cybersecurity and data privacy - Risk of disputes between roommates

B. Are there customers for your business in other countries? How do you plan to reach them?

UniStay can serve both local and international students since accommodation challenges exist in many countries. UniStay plans to reach them by university partnership, digital marketing, partnering with student ambassadors to promote UniStay, as well as promoting UniStay through student communities, university groups, and online forums where students frequently seek accommodation recommendations.

4.3 Competitive Analysis

A. How do you define/describe your competition--both direct and indirect?

Direct Competitors

- Student-focused accommodation platforms such as AmberStudent and Casita that help students find housing near universities.
- Property rental platforms such as iProperty Malaysia and Mudah.my that provide accommodation listings.

Indirect Competitors

- Social media and community-based channels such as Facebook Marketplace and student WhatsApp/Telegram groups where students search for accommodation independently.
- Traditional housing agents and university accommodation offices that assist students in finding housing.

These competitors provide housing search services, but most do not offer a complete solution that combines verified listings, roommate compatibility matching, automated split payments, and student-focused safety features in a single platform.

B. Describe your competitive advantage. UniStay's competitive advantage lies in its **all-in-one student housing ecosystem**. Unlike traditional property platforms that only provide listings, UniStay combines:

- Verified accommodation listings to reduce rental scams and fraudulent advertisements.
- AI-powered roommate compatibility matching based on lifestyle preferences, study habits, cleanliness standards, and budget.
- Automated rent and utility bill split-payment systems to reduce financial disputes among roommates.
- Student-focused design that specifically addresses the challenges faced by local and international students.
- In-app communication and safety features that improve trust and convenience throughout the rental process.

This integrated approach provides a safer, more convenient, and more personalized housing experience than existing alternatives.

- C. Find three competitors and describe them using the table below or an EXCEL spreadsheet. You can also use a format defined in the text. Using a scale of 1 to 5 with 1 being to lowest score and 5 being the best, rate your company and your top 3 competitors on dimensions that apply to your business. The ones provided are suggestions.

Table 4.8 Competitive Analysis									
		UniStay		AmberStudent		iProperty		Facebook Marketplace	
	Wt.	Rating	Wtd. Rating	Rating	Wtd. Rating	Rating	Wtd. Rating	Rating	Wtd. Rating
Quality	0.20	5	1.00	4	0.80	4	0.80	2	0.40
Price	0.15	4	0.60	3	0.45	3	0.60	5	0.75
Location	0.10	5	0.50	4	0.40	4	0.50	5	0.50
Selection	0.10	4	0.40	5	0.50	5	0.50	4	0.40
Service	0.15	5	0.75	4	0.60	3	0.45	2	0.30
Speed or Turnaround	0.10	5	0.50	4	0.40	4	0.40	4	0.40
Specialization	0.10	5	0.50	4	0.40	2	0.20	1	0.10
Personalization	0.10	5	0.50	3	0.30	2	0.20	1	0.10
Total	1.00	xxxxx	4.75	xxxxx	3.85	xxxxx	3.50	xxxxx	2.70

Reasoning: UniStay scores highest due to its roommate matching algorithm, verified listings, and split-payment features, which are not commonly offered by competitors as an integrated service.

Note: The weights for all of the factors must add up to 1.00. Weights should be based upon importance of the factor to the customer. *Weighted Rating = Weight x Rating*. To compare firms, total the Weighted Rating for each company.

- D. Describe any international competitors you have found who may be able to access your customers. How do you intend to compete?

Table 4.9 International Competition

International Competitor	Method of Competition
AmberStudent	Provides international student accommodation listings in multiple countries.
Casita	Focuses on student housing near universities worldwide.
UniversityLiving	Offers accommodation booking services for international students
Student.com	One of the largest student accommodation booking platforms globally.
HousingAnywhere	Provides accommodation for international students and young professionals across many countries.

How UniStay intends to compete:

- UniStay will compete by focusing specifically on the Malaysian student housing market and offering services tailored to local and international students studying in Malaysia. Unlike international competitors that mainly provide accommodation listings, UniStay combines verified housing, roommate compatibility matching, automated rent splitting, and localized customer support in a single platform. Strategic partnerships with universities, student associations, and property owners will further strengthen market penetration and user trust.

E. Describe your strategy for outperforming the competition.

Table 4.10 Competitive Advantage	
Competitive Advantage Question	Competitive Difference (USP)
<i>The Offer:</i> What will be better and different about the products and services that will be sold by the business?	Verified housing, roommate matching, split payments, and safety tools in one platform.
<i>Target Market:</i> To make it as successful as possible, which customers should be the focus of the business?	University students, especially first-year and international students who face housing challenges.
<i>Production and Delivery Capability:</i> What will be better or different about the way that offer is produced and delivered to those customers?	Digital platform with automated verification, AI matching, secure payments, and university partnerships.

F. What tactics will you use to carry out this strategy?

Table 4.11 Marketing Tactics		
Tactical Question	Issues	Solutions
<i>Sales Plan:</i> Where and how will you sell to your customers?	How to identify prospects and convert them to sales	Partner with universities, student associations, orientation programs, and student ambassadors. Offer referral rewards and early-adopter incentives.
<i>Market Communications:</i> How will you communicate with your customers and make them aware of your business offer?	How to make customers aware of your offer; how to attract them to the business	Use social media marketing (TikTok, Instagram, Facebook), influencer collaborations, university roadshows, and targeted digital advertising.
<i>Operating Plan:</i> How will you manage your internal operations?	How to make the business go, and determine who will perform the tasks	Implement property verification procedures, identity verification systems, automated moderation tools, and dedicated customer support.
<i>Budget:</i> How do you plan to manage your revenues and expenses?	Possible sources of revenue; possible items that have to be purchased	Adopt lean operations, monitor KPIs monthly, prioritize high-ROI marketing campaigns, and diversify revenue streams through subscriptions, commissions, and premium services.

G. What barriers to entry can you create to support your organization? UniStay will create several barriers to entry that make it difficult for new competitors to replicate its business model:

1. **Proprietary roommate matching algorithm** that improves compatibility and user satisfaction.
2. **Verified property database** developed through partnerships with landlords, agents, and universities.
3. **Network effects**, where more students attract more landlords and vice versa, increasing platform value over time.
4. **University partnerships and student ambassador programs** that provide exclusive access to target users.
5. **Integrated ecosystem** combining accommodation search, roommate matching, secure communication, digital agreements, and automated split payments within a single platform.
6. **Strong brand trust and reputation** built through scam prevention, verification systems,

and excellent customer service.

5.0 Marketing Strategy & Plan

A. Explain how your marketing plan targets your market segment.

Table 5.1 Market Segmentation		
Segmentation Method	Segment(s)	Marketing Approach
Geographic		
Demographic		
Psychographic		
Behavioral		

B. Write a positioning statement for your business.

(Your business name/brand) is the (competitive/industry category) that (provides these benefits or points of difference) to (audience/target market).

_____ is the _____ that _____
_____ to
_____.

C. How do you plan to grow the organization (*self-generated, franchising, acquisition*)?
Select only the method(s) that apply to your company.

Table 5.2 Growth Plans		
Method of Growth	Planned? Y/N	Description
Self-generated		
Franchising		
Acquisition		
Other		

5.1 Products/Services

A. What products/services do you intend to sell? (Table 5.3 is identical to Table 1.3)

Table 5.3 Product/Service Offerings	
	Description
Product/Service 1	
Product/Service 2	
Product/Service 3	
Product/Service 4	

B. Explain how your product will meet a customer need.

C. Where is your product/service in the product life cycle? Each product should be in one of these stages based upon its industry and the like. You may have multiple products in the same industry, but some are new to the industry and are in the introductory stage while others are more mature products. The industries you are in also may be at various stages of the product life cycle and can be indicated here as well.

Table 5.4 Product/Service Life Cycle Stages					
	Introduction	Growth	Maturity	Decline	Industry?
Product/Service 1					
Product/Service 2					
Product/Service 3					
Product/Service 4					

D. Describe the features and benefits of the product/service your business will focus on selling.

Table 5.5 Features and Benefits		
Product/Service	Features	Benefits

Product/Service 1		
Product/Service 2		
Product/Service 3		
Product/Service 4		

E. What copyrights or patents do you own or expect to own?

F. How will your organization help others? List all the organizations to which you plan to contribute. (Your contribution may be time, money, your product, or something else.)

Table 5.6 Philanthropic Plans			
Organization	Constituency	Contribution	Rationale

G. Do you intend to publicize your philanthropy? Why, or why not? If you do, explain how you will work your philanthropy into your marketing.

5.2 Pricing

A. Describe your pricing strategy and structure and the gross margins you expect to generate.

Table 5.7 Pricing Strategy and Expected Gross Margins		
Product	Pricing Strategy (keystoning, cost-plus, penetration, skimming, meet or beat)	Expected Gross Margin

Product/Service 1		
Product/Service 2		
Product/Service 3		
Product/Service 4		

B. What will your discount structure, if any, be? This would be an excellent place to include the pocket-price waterfall or the pocket-price band to illustrate the discount structure and how prevalent it will be.

C. Will you accept personal checks from customers? Credit cards? Will you offer charge accounts or customer credit?

Table 5.8 Customer Payment Options		
Type of Payment	Accept? (yes/no)	Rationale
Cash		
Personal checks		
Credit cards (which ones – VISA, MasterCard, American Express, Discover?)		
Credit terms (if so, what will they be?)		

5.3 Promotion

A. Identify the ways you plan to promote your product or service, including the message, the media, and the distribution channels. Describe why you have chosen these methods and why you think they will work. (not applicable)

Table 5.9 Promotional Plans				
Method	Use?	When?	Message, Media, Channel	Rationale
Ad. specialties	no			
Banner ads	yes	Launch period	Instagram, TikTok, Google Ads	Reach digital-native students
Billboards	no			

Blogs	yes	Before launch & ongoing	Student housing tips on website blog	Improve SEO and organic traffic
Broadcast media	no			
Brochures	no			
Business cards	no			
Catalog	no			
Direct mail	no			
Directories	no			
Flyers	yes	Orientation Week	University campuses	Direct exposure to freshman
Networking	yes	ongoing	University partnerships & student clubs	Reach target students directly
Newsletters	no			
Online store	no			
Print media	no			
Public speaking	no			
Sales calls	no			
Samples	no			
Signs	no			
Special events	yes	Orientation week	Campus booths and housing workshops	Meet students during accommodation search period

Web site	yes	Continuous	Official UniStay platform	Primary service channel

B. Show examples of marketing materials you intend to use. (attach in appendices) at least 2

Examples of marketing materials are attached in Appendixes.

C. What is your business slogan?

Find Your Place. Find Your People.

D. Do you have a logo for your business? ☐ Yes ☐ No How do you intend to protect it?

UniStay will use a unique logo that represents safe and convenient student accommodation. The company intends to protect the logo through trademark registration in Malaysia. The logo will be consistently used across the website, mobile application, social media platforms, and marketing materials to strengthen brand recognition and prevent unauthorized use.

E. Where do you intend to advertise (*be specific including identifying reach and frequency*)?

Table 5.10 Advertising Plan				
Publication/Media (name specific print publications or broadcast channels)	Size/Length of Advertisement	Frequency of Advertising & Time Frame	Reach	(Cost for Budget)

F. How do you plan to get publicity for your organization?

G. How do you intend to provide superior customer service.

H. Identify five specific sales prospects you intend to pitch.

Table 5.11 Specific Prospects	
Name	Description (include interest)

I. How will you keep your customer database?

--

J. What essential questions will you ask every customer for your database and what data do you anticipate securing? Why?

Table 5.12 Customer Data		
Question	Variable	Purpose

5.4 Place

A. Where do you intend to sell your product? Describe the advantages and disadvantages of your location(s).

Table 5.13 Business Locations		
Location	Advantages	Disadvantages
Online (Primary) – UniStay mobile application and website	Accessible to students anytime, anywhere; low overhead costs compared to physical branches; scalable to support unlimited users; allows integration of digital tools (matching, payments, chat); easy to update features and content.	Requires strong digital marketing to drive traffic; students may have questions that need quick answers; reliance on stable internet connectivity for users; potential technical issues or downtime risks.
Physical Office – Bandar Sunway, 47500 Subang Jaya, Selangor, Malaysia	Centrally located near major universities (e.g., Taylor's University, Sunway University, Monash University); accessible for meetings with landlords, university partners, and student focus groups; builds trust with local property owners; convenient for team collaboration and operations.	Limited geographic reach (only serves as an administrative hub); rental and utility costs add to fixed expenses; does not directly generate revenue; not a walk-in customer service center for most students.

B. What are surrounding businesses?

The Bandar Sunway office is surrounded by:

- Universities (Taylor's University, Sunway University, Monash University)
- Educational institutions and student dormitories
- Cafes and co-working spaces popular with students
- Property management agencies and real estate offices
- Shopping malls (Sunway Pyramid) and public transportation hubs (BRT Sunway Line)
- Banks and financial service providers

Access routes? The office location is accessible via:

- BRT Sunway Line – Connects to USJ and KL-Sentral stations
- Major access routes include:
- Federal Highway
- New Pantai Expressway (NPE)
- Damansara–Puchong Expressway (LDP)
- Bus and BRT Sunway Line connections
- Nearby KTM and LRT transportation access
- Federal Highway and NKVE – Accessible by car or ride-hailing services
- Local bus routes – Serving the Sunway area
- Pedestrian walkways – Linking to nearby universities and commercial areas

C. If vehicular traffic is important to your organization, what is the traffic count for this location? Vehicular traffic is moderately important for UniStay because most business activities occur digitally. However, the Bandar Sunway area experiences high daily traffic due to the concentration of universities, shopping centers, offices, and residential areas. The large student population and high public transportation usage increase visibility and accessibility for business networking and promotional activities.

D. What is the work force availability in the area as it pertains to your needs? (Be sure to get data from the census, local department of labor, or other reliable source.)

The Klang Valley, particularly the Bandar Sunway area, offers strong workforce availability that aligns well with UniStay's operational and technical requirements. As a major education and technology hub, this region is home to several prominent universities including Taylor's University, Sunway University, and Monash University Malaysia, which produce a steady stream of graduates in computer science, software engineering, information technology, digital marketing, and business administration.

This provides UniStay with access to qualified talent for key roles such as software developers, UI/UX designers, marketing executives, and operations staff. The area also benefits from a diverse, multilingual workforce, making it easier to recruit customer support personnel who can assist both local and international students in languages such as English, Mandarin, and Tamil.

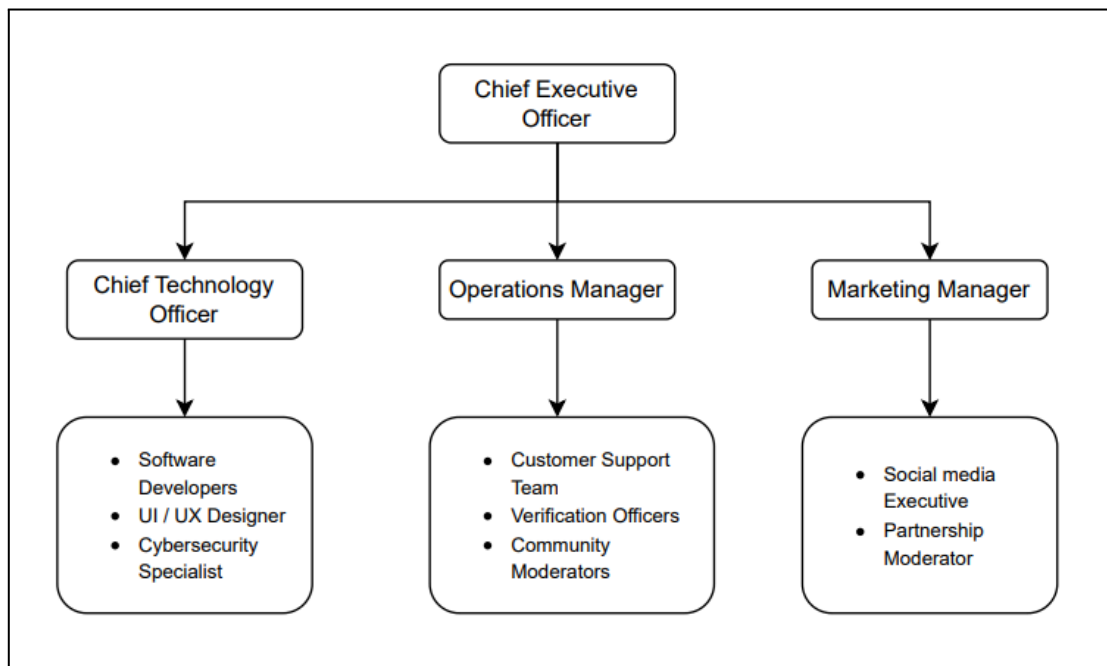

Additionally, the mature startup and property technology ecosystem in Selangor and Kuala Lumpur means that experienced professionals in property management, verification services, and community moderation are readily available. While competition for top

technical talent can be high due to the presence of many technology companies in the region, UniStay can attract skilled employees by offering flexible working arrangements, career development opportunities, and a mission-driven work environment focused on student safety and social impact. Overall, the workforce availability in the Bandar Sunway area is sufficient to support UniStay's initial hiring needs and future growth.

6.0 Management & Operations

6.1 Management Team

A. Create an organizational chart for your business.

B. Will you be hiring employees? If so, describe what their qualifications should be, what you intend to pay them, and how they will help your business.

Employee Role	Qualifications	Compensation	Contribution	When Hired
Chief Executive Officer	Business Management Skills Leadership Skills	Monthly Salary and Equity Ownership	Oversee the company direction and the business growth	At Start Up
Chief Technology Officer	Degree in Computer Science or Software engineering, App Development Experience	MYR 7,000 - MYR 10, 000	Manage the system development and the cybersecurity. Furthermore, oversee the platform maintenance.	At Start Up
Software Developer	Programming Skills and App Development Experience	MYR 4,000 - MYR 8,000	Develop and maintain the UniStay Application	At Start Up
UI / UX Designer	Interface Design and User Experience Skills	MYR 3,500 - MYR 5,000	Design the application and ensure it's student friendly and accessible platform	Before Development Stage

Operations Manager	Organizational Skills and Communication Skills	MYR 4,500 - MYR 6,500	Handles the daily operations, relationship with the landlords and resolving any issues	At Start Up
Verification Officer	Attention to Detail and Customer Verification Experience	MYR 3,000 - MYR 4,000	Verifies the student identifications and the property listings to reduce the scams	Before Launch
Customer Support Staff	Communication and Problem Solving Skills and the ability to speak multiple languages.	MYR 2,500 - MYR 3,500	Assist the clients (Students and Landlords) with any issues	Before Launch
Marketing Manager	Digital Marketing and Branding Experience	MYR 4,000 - MYR 6,000	Promote UniStay through campaigns and university partnerships	Before Launch
Social Media Executive	Social Media Management and Content Creation Skills	MYR 2,500 - MYR 3,500	Build online engagement and student awareness	Before Launch
Community Moderator	Communication Skills and Conflict Management Skills	MYR 2,500 - MYR 3,000	Moderate in-app communities to ensure safe communication	After Launch

C. Do you intend to pay yourself a salary, wage, dividend, or commission? Explain.

During the early stages of launching Unistay, the founders can pay themselves a monthly salary to maintain the ability to financially support themselves however when UniStay grows, the founders can start to receive dividends based on the performance of the company and as according to the shareholder agreements. Furthermore, the dividends is given after taking the profit needed to be reinvested into account.

D. What will your primary policies toward employees be?

Table 6.2 Key Employee Policies	
Policy	Purpose
Equal Opportunity Employment	UniStay Employees are given a fair hiring and promotion opportunity regardless of the race, gender, nationality, or religion.

Professional Conduct Policy	The Employees must ensure to maintain respectful and ethical behavior in the workplace.
Data Privacy and Confidentiality	UniStay must ensure that student and landlord sensitive information is protected from data leak and misuse of the information.
Flexible Working Policy	The employees must enjoy a work-life balance and productivity.
Performance Evaluation Policy	Encourage employee growth and accountability.
Customer Service Standards	Employees must ensure a professional and support interactions with the users (Students and Landlords)

E. What will you do to make your company a positive and rewarding place to work?

UniStay can make sure to be a positive and rewarding place to work by ensuring inclusivity, teamwork and respect. Employees are provided training opportunities and a flexible work arrangement with clear career development paths. This will result in the employees becoming motivated to work. Furthermore, employees will be encouraged to share ideas and contribute to the innovation and growth of the company.

Additionally, UniStay will also recognize the employees' efforts through performance rewards and appreciation programs. Thus ensuring that the employees feel comfortable with discussing their concerns and challenges which will result in the company growing in a positive environment.

F. Describe the corporate governance plan for your organization. It should include five policies (rules) that will be the backbone of your organization's ethics.

UniStay will implement a corporate governance plan that will promote accountability, transparency, fairness and ethical decision making in running the company. The management will monitor the operations, financial performance, customer complaints and the platform safety standard to maintain the stakeholder trust. Furthermore, the company will establish internal policies to protect sensitive data and ensure anti-fraud measures and ensure responsible business practices.

Table 6.3 Ethics Policies

1. Protect all user data and privacy responsibly

2. Prevent Scam activities and fraudulent listings
3. Treat Stakeholders fairly and respectfully
4. Maintain transparency in pricing, contracts and services
5. Promote safe and inclusive housing environments

G. Provide information for each of your mentors or advisors. If there is a board of advisors, list each member and describe his/her commitment to the board.

Name: Dr Thivashi

Title: Ideating Business Startup Mentor

Organization: Taylor's University

Address: 1, Jln Taylors, 47500 Subang Jaya, Selangor

City: Petaling Jaya State: Selangor Zip: 47500

Phone: _____

Email: thivashini.jk@taylors.edu.my

(use real company (name and phone can use fake)

H. Provide contact information for your accountant, attorney, banker, and insurance agent.

ACCOUNTANT

Name: _____

Title: _____

Organization: _____

City: _____ State _____

Phone: _____

6.2 Research & Development

A. What type of research are you doing? What do you intend to do?

UniStay conducts continuous research focused on student accommodation challenges, user behavior, and platform performance. Research activities include studying housing preferences, roommate compatibility factors, rental scam prevention methods, and user experience improvements. The company also collects feedback from students and landlords to identify service gaps and improve customer satisfaction.

In the future, UniStay intends to develop and improve its AI-powered roommate matching algorithm, enhance property verification systems, strengthen cybersecurity measures, and introduce predictive recommendation features that help students find suitable accommodations more efficiently.

B. What are others in the industry doing?

Companies in the student accommodation and property technology industry are investing in artificial intelligence, digital verification systems, mobile applications, secure online payment solutions, and customer experience improvements. Many competitors focus on expanding accommodation listing and improving booking convenience. Some international platforms also use data analytics to personalize housing recommendations and improve user engagement.

C. How will you protect your intellectual property?

Table 6.4 Intellectual Property Protection	
Type	How It Will Be Used
Patents	Protect proprietary roommate matching technology and automated payment system innovations
Trademarks	Protect the UniStay brand name, logo, and visual identity
Service Marks	Protect services associated with accommodation matching and housing support
Copyrights	Protect website content, software code, application design, database, and marketing materials

6.3 Physical Location

A. Describe the actual physical place in greater detail than above.

UniStay will operate from a small administrative office located in the Klang Valley area of Selangor. The office will support management, customer service, marketing, business development, and platform administration activities. As a digital platform business, most operations will be conducted online through cloud-based systems, allowing the company to maintain a lean operating structure while serving students throughout Malaysia.

The location provides access to major universities, transportation networks, technology talent, and business support services. This strategic location allows UniStay to maintain close relationships with students, universities, landlords, and property management

partners.

C. What are the zoning laws in your area? Does your business comply?

UniStay will operate within a commercially zoned office space that complies with local municipal regulations in Selangor. Since UniStay is a technology-based service platform and does not conduct manufacturing or industrial activities, it is subject primarily to commercial office requirements. The company will comply with local business registration requirements, building regulations, workplace safety standards, and data protection regulations applicable in Malaysia.

6.4 Facilities

A. What type of building and equipment will you have?

UniStay will primarily operate from a small office space equipped with computers, laptops, high-speed internet, cloud servers, office furniture, and communication tools. As a technology-based platform, most operations can be conducted digitally. Additional equipment may include software subscriptions, data storage systems, and cybersecurity tools to ensure secure platform operations.

B. Identify which technological tools you plan to use for your organization, and explain why.

Technological Tool	Source	Value to organization
Cloud Computing	Amazon Web Services / Google Cloud	Stores user data securely, supports platform scalability, and ensures reliable system performance
Payment Gateway	Paypal / FPX / Credit and Debit Card	Enable secure online payments and automated rent and utility bill splitting between roommates
Roommate Matching Algorithm	In-house Development	Analyzes user preferences and lifestyle data to recommend compatible roommates
Google Maps API	Google	Helps students locate accommodations near universities, public transport, and essential facilities
Customer Relationship Management (CRM)	HubSpot	Manages customer inquiries, user support, communication, and user engagement efficiently

- Cloud Computing allows UniStay to handle increasing numbers of users without investing in expensive physical servers
- Payment Gateway simplifies rent collection and reduces payment disputes among roommates
- Roommate Matching Algorithm serves as UniStay's key competitive advantage by

- improving roommate compatibility
- Google Maps API helps users make informed housing decisions based on location and accessibility
- CRM System improves customer satisfaction by providing efficient support and communication

C. How do you plan to get access to the technology you need?

UniStay plans to access the required technology through a combination of cloud service providers, third-party software vendors, and in-house development. Cloud infrastructure such as AWS or Google Cloud will be subscribed to for data storage and platform hosting, while APIs such as payment gateways and Google Maps will be integrated through service partnerships. The roommate matching system and core platform features will be developed internally by the software development team

6.5 Inventory, Production, & Quality Assurance

A. Where are you purchasing the products you plan to sell, or the parts you will use to manufacture those products? Illustrate your supply chain.

Table 6.6 Suppliers	
Product/Part	Source
Server Hosting & Cloud Infrastructure	Cloud Service Providers (AWS, Google Cloud)
Digital Property Listings	Verified Property Owners and Real Estate Agents
Payment Gateway Integrations	Third-Party Financial Service Providers
User Verification & Authentication	University Email Systems & Third-Party Identity Verification Services

B. Do you intend to manufacture your product? If so, describe the manufacturing process you will use. If not, describe how your product is manufactured.

Unistay does not manufacture its own physical goods. However, the product is a software platform that is developed by our own technical team. The production process involves software engineering, algorithm development to create the compatibility roommate matching system, and the integration of a secure digital agreement and payment protocols,

C. Are there any economies of scale to be attained for your business? At what point do you anticipate attaining them?

Unistay will achieve large economies of scale through strong network effects which is

driven by education hubs in Malaysia. For example, in Taylor's university area, many international students struggle to find secure, off-campus housing due to the high cost and limited availability of university dorms.

By solving this pain point, Unistay can expect a rapid adoption rate among students who are seeking affordable alternatives. As this student user base grows, more property owners will want to list their verified properties on the platform. This continuous cycle allows us to distribute our initial costs among a rapidly expanding user base.

We anticipate to attain the economics of scale shortly after reaching the key university areas. As the application becomes the main housing ecosystem for students, our ongoing acquisition costs will naturally decrease which increases revenue.

D. Have you developed and/or adopted any innovations in production, inventory management, or distribution that are significant? What are they and why are they meaningful?

UniStay introduces two main innovations to the student housing market:

1. **Compatibility-Based Roommate Matching:** Instead of random assignment between roommates, the platform uses an algorithm that generates a roommate compatibility score based on user inputs regarding sleep schedules, cleanliness, study habits, and budget. This will significantly reduce roommate conflict and improve retention.
2. **Automated Split Payment System:** The platform innovates rent distribution by automatically separating and generating individual bills for rent, utilities, and optional renter protection plans, thereby eliminating the burden of a single student manually managing group finances.
3. **Verified Inventory Management & Smart Filtering:** we implement a strict verification process for landlords and agents, including identity and ownership checks, to actively reduce rental scams. Furthermore, the platform uses a safety rating system and smart filtering so students can find properties based on verified safe areas, transportation access, and essential facilities. This ensures highly secure transactions and a controlled quality distribution of housing options.

E. Show the production-distribution channel for your business, and the mark-ups along the chain.

Table 6.7 Mark-Up Structure		
Stage of Channel	Mark-up	Notes
Property Onboarding	Premium Landlord Subscriptions	Owners can pay for boosted listings, verified badges, and demand analytics.
Student Placement	Commission Fees	UniStay earns a commission fee from

		landlords or agents upon successful student placement.
Post-Placement / Residency	Financial Service Partnerships	Revenue is generated through deposit installment plans, service partnerships, and renter insurance programs.

F. What is the estimated delivery time between when you place an order with your supplier and when you will have the product available for your customers? (If there are multiple suppliers, you should identify each lead time and work on the basis of the longest lead time.)

The estimated lead time is 7 days, including property verification, ownership checks, photo review, location confirmation, and final approval before the listing becomes available to students. The longest supplier lead time used for planning purposes is 7 days.

G. What method(s) will you use to define and ensure the quality of your products/services?

Table 6.8 Quality Assurance		
Method	Planned? (y/n)	Rationale
Benchmarking	Y	Compare features, security, and user experience with leading housing platforms to maintain competitiveness
Lean Manufacturing	N	Not applicable as it provides digital services
ISO9000	N	Not practical due to cost and complexity
Six Sigma	N	Not necessary since processes are still developing and don't require advanced quality control techniques
TQM	Y	Focus on continuous improvement through use feedback, service monitoring, and staff involvement

Malcolm Baldrige National Quality Award	N	Not suitable
Other (identify)	Y	Property verification, user reviews, and feedback collection to ensure quality and trust

H. What types of insurance will your business need, and why?

Table 6.9 Insurance		
Type of Insurance	Needed (y/n)	Why?
Workers' Compensation Insurance	Y	Covers employee accidents
Disability Insurance	N	Not essential
Commercial Fleet Insurance	N	Does not operate company vehicle
Property Insurance	Y	Protect office equipment from damage or theft
Liability Insurance	Y	Protects against legal claim arising from use disputes
Product Liability Insurance	N	Provides services
Business Income Insurance	Y	Help cover lost income
Errors and Omissions Insurance	Y	Protect against claims related to listing errors, verification mistakes
Life Insurance—Key Person Insurance	N	Not necessary

I. What methods will you use to ensure that you comply with federal, state, and local tax laws?

Comply with tax laws by maintaining accurate financial record, using accounting software, and consulting tax professionals to ensure timely and accurate tax fillings and payments

J. What laws—such as minimum wage and age requirements, health and safety regulations, or antidiscrimination laws—will affect your business?

Table 6.10 Laws Affecting UniStay Company	
Law	Effect on Business

Minimum wage laws	Ensure employees are paid at least the legal minimum wage
Anti discriminations laws	Provide a safe working environment
Data protection & privacy laws	Protect user's personal information and student data
Consumer protection laws	Ensure transparent listings and pricing
Housing & rental regulations	Ensure property listing and rental agreements comply with local housing laws

7.0 Financial Analysis & Projections

A. Describe your record keeping system.

B. List the types of financial accounts you will open for your organization.

Table 7.1 Financial Accounts

B. Identify any external factors that you feel should be disclosed as substantial risks.
(incorporated above)

8.0 Funding Request & Exit Strategy

8.1 Amount & Type of Funds Requested

A. Clearly state how much money you are requesting in this plan and the terms under which you anticipate obtaining the funds?

(*Company*) requests \$(*amount*) in the form of (*type and terms*).

B. Do you intend to use debt to finance your business? Explain.

C. Do you plan to issue bonds to finance your business at some point in the future?

8.2 Exit Plan

A. How will investors get paid back/out? Public offering? Employee buyout? Merger or acquisition? Liquidation? Stock buyback? (only applicable)

Table 8.1 Investor Exit Strategy		
Form of Payment/Payout	Planned (yes/no)	Anticipated Time Frame
Repayment of debt		
Public offering		
Employee buyout		
Merger/acquisition		
Liquidation		
Stock buyback		

B. Do you plan to franchise your business, or license any of your products? Explain.

8.3 Milestones

Create a PERT chart for your organization to make your plans clear to potential investors.

Table 8.2 Milestones						
_____ Company						
Task	Period 1	Period 2	Period 3	Period 4	Period 5	Period 6

Note: This chart should be as detailed as is useful in the business plan.

Appendices

Resumes & Position Descriptions

1. Include a resume for each key team member.
2. Add position descriptions for any vital start-up positions that are not yet filled.

Sample Promotional Materials

1. Include any sample logos, letterhead, advertisements, brochures, or other items that can be inserted into the plan.
